

Hello AMS Community,

The Unidata Users Committee invites you to join Unidata staff, community members, and distinguished speakers at the 2015 Unidata Users Workshop, scheduled to take place 22-25 June 2015 in Boulder, Colorado. This year's workshop is titled "Data-Driven Geoscience: Applications, Opportunities, Trends, and Challenges," and its goal is to raise awareness of important new trends in geoscience technology, including cloud computing, data management, and the place of Python in the geoscience computing infrastructure. The workshop is a chance for the academic community to share hands-on activities, course materials, and ideas for improving research and education.

The Unidata Users Committee encourages you to register now by visiting the workshop web site at:

<http://www.unidata.ucar.edu/events/2015UsersWorkshop/>

There are stipends available for qualified student participants. See the Student Announcement on the workshop web site for additional information.

We look forward to seeing you in Boulder this June!

Kevin Tyle, Chair  
Unidata Users Committee

Mike Baldwin and Steven Lazarus  
2015 Workshop Co-Chairs
